This report was prepared by the Albany Area Metropolitan Planning Organization and was financed in part through the United States Department of Transportation Federal Highway Administration PL and Federal Transit Administration Section 5303 funds and in part through local matching funds provided by the Oregon Department of Transportation. The contents of this document are solely the responsibility of AAMPO. The United States Department of Transportation and its agencies and the Oregon Department of Transportation assume no liability for the content of this document or for the use of its contents.

Introduction

The U.S. Congress, through adoption of the transportation act, Fixing America’s Surface Transportation (FAST) Act, requires all Metropolitan Planning Organizations (MPOs) to publish an annual listing of projects for which federal funds have been obligated (49 USC Chapter 53, Section 5303). This provision is intended to increase the transparency of government spending on transportation projects and programs and to increase the public’s understanding of how federal funds are being spent.

This report outlines transportation projects and programs within the Albany Area Metropolitan Planning Organization (AAMPO) with funds obligated during the 2025 federal fiscal year (FFY25): October 1, 2024– September 30, 2025.

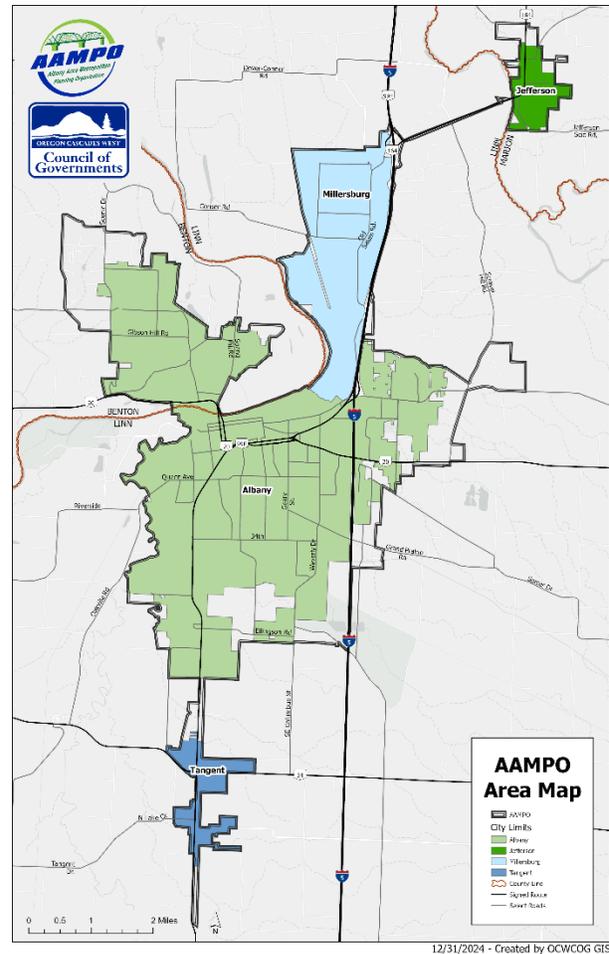

Other federally funded projects that have already been obligated, or those not anticipated to be obligated in the short term may not be included. Additionally, projects that did not have funds obligated during FFY25 may not be included but may still be moving forward on schedule. (In some cases, delayed obligation may occur without affecting a project schedule.) Projects included in this report are consistent with the AAMPO Transportation Improvement Program (TIP).

It is the primary responsibility of the MPO to prepare the Obligation Report, in coordination with MPO member jurisdictions, the Oregon Department of Transportation (ODOT) and the operator of Albany Transit service (the City of Albany). This document is also available on the AAMPO website: www.AlbanyAreaMPO.org.

About the Albany Area Metropolitan Planning Organization

AAMPO has been designated by the Oregon Governor as the metropolitan planning organization (MPO) for the Albany Urbanized Area. Federal regulations require that MPOs be formed for all Urbanized Areas with a population of 50,000 or more in order to provide for continuing, cooperative and comprehensive planning for the region. AAMPO includes the cities of Albany, Jefferson, Millersburg, and Tangent as well Linn County, Benton County and the Oregon Department of Transportation. Elected officials from each of these jurisdictions compose the governing body of the MPO, along with ODOT regional planning staff. A Technical Advisory Committee (TAC) composed of staff from each member jurisdiction serves in an advisory capacity to MPO’s governing body. Staffing, including fiscal and administrative support, is provided by the Oregon Cascades West Council of Governments (OCWCOG). The AAMPO planning area is shown in Figure 1.

Terminology

Obligation in the context of this report is the Federal government's legal commitment to pay the Federal share of a project's cost. An obligated project is one that has been authorized by a Federal agency as meeting eligibility requirements for federal funds. Projects for which funds have been obligated are not necessarily initiated or completed in the program year. For obligations on a construction project, typically the project needs to complete a competitive bid process and begin construction if an acceptable bid is received. Alternatively, projects may have obtained permission to proceed to construction using local funds, with the ability to be obligated and reimbursed with federal funds at a later date.

The amount of the obligation usually does not equal the total cost of the project. An obligation may be for only one phase of a multi-phased project, and the obligation amount listed does not account for local funding spent on a project.

For Federal Transit Administration (FTA) projects, obligation occurs when the FTA grant is awarded. For Federal Highway Administration (FHWA) projects, obligation occurs when a project agreement is executed and the recipient agency requests that the funds be obligated. A project agreement defines specific project elements that are eligible for funding; how financing will occur; and agency roles, responsibilities and liabilities.

Once funds have been obligated, the eligible recipient begins incurring eligible project expenses and then requests reimbursement from the obligated funds. The reimbursement request must demonstrate that the recipient incurred the costs consistent with the project agreement and all federal rules.

Deobligation occurs when funds that have been originally obligated for a specific project have to return that promise of funds to the federal government. This generally occurs when money that has been set aside for a project has not been fully spent. Thus the promise of funds is returned to the federal government.

Funding Sources

Surface Transportation Program (STP) / Surface Transportation Block Grant (STBG) funds are a flexible multi-modal block grant-type program. STP/STBG funds provide for a broad range of transportation uses and may be used for projects on the Federal-aid highway system (including the NHS), bridge projects on any public road, transit capital projects, and intracity or intercity bus terminals and facilities. A percentage of STP/STBG funds allocated to the state of Oregon is distributed to cities, counties and MPOs on a formula basis by the Oregon Transportation Commission (OTC).

National Highway Performance Program (NHPP) projects must be on an eligible facility and support progress toward achievement of national performance goals for improving infrastructure condition, safety, mobility, or freight movement on the NHS, and be consistent with metropolitan and statewide planning requirements.

Federal National Highway Freight Program (NHFP) funds are allocated to the Oregon Department of Transportation (ODOT) annually through a formula methodology, to be used to improve the efficient movement of freight on the National Highway Freight Network (NHFN).

Section 5307 funds are distributed on a statutory formula basis to support capital, operating, and planning expenditures for publicly owned transit systems. 5307 funds have a 20% local match when used for capital or planning projects and a 50% match when used for transit operations.

Section 5339 funds support capital purchases for public transportation systems. Funds are granted on a project-by-project basis and require a 20% local match.

Section 5310 funds support transportation services for the elderly and persons with disabilities. The funds may go to private, nonprofit organizations or to public bodies that coordinate service. Funds can continue to be used for capital costs or for capital costs of contracting for services. Section 5310 funds are awarded on an annual competitive basis.

Metropolitan Planning funds (PL and 5303) are available for MPOs to carry out the metropolitan transportation planning process required by 23 U.S.C. 134, including development of metropolitan area transportation plans and transportation improvement programs. Under 23 U.S.C. 134, MPOs are responsible for developing, in cooperation with the State and affected transit operators, a long-range transportation plan and a metropolitan transportation improvement program (MTIP) for the area. Metropolitan Planning funds are provided through the Oregon Department of Transportation to MPOs in order to support metropolitan planning processes.

Infrastructure Investment and Jobs Act (IIJA) provides funds for infrastructure projects, including: roads, bridges, and major projects; passenger and freight rail; highway and pedestrian safety; public transit; broadband; ports and waterways; airports; water infrastructure; power and grid reliability and resiliency; resiliency, including funding for coastal resiliency, ecosystem restoration, and weatherization; clean school buses and ferries; electric vehicle charging; addressing legacy pollution by cleaning up Brownfield and Superfund sites and reclaiming abandoned mines; and Western Water Infrastructure.

Fixing America's Surface Transportation Act (FAST) a five-year legislation (2016-2020) to improve the Nation's surface transportation infrastructure, including our roads, bridges, transit systems, and rail transportation network. The bill reforms and strengthens transportation programs, refocuses on national priorities, provides long-term certainty and more flexibility for states and local governments, streamlines project approval processes, and maintains a strong commitment to safety. Later replaced by the IIJA.

Moving Ahead for Progress in the 21st Century Act (MAP-21) a two-year authorization (2013-2014) to modernize transportation policy, address infrastructure needs, and improve safety and efficiency. Later replaced by the FAST Act.

Note: Projects that use the State Fund Exchange are not included.
